

"The U-MOB LIFE Project has received funding from the LIFE programme of the European Union"

II European Conference on Sustainable Mobility at Universities

March 14th to 15th, 2019
Cracow University of Technology

EVALUATION QUESTIONNAIRE

Total assistants/speakers: 164
Total questionnaires filled: 51

QUESTION 1

My general impression of the Conference was...

Poor	Fair	Neither	Good	Excellent
		3	21	25

Specific commentaries:

1. I would have expected more public and more project posters.
2. Too many Italian and Spanish examples without detailed information.

QUESTION 2

The information received before the meeting was...

Poor	Fair	Neither	Good	Excellent
1			16	31

Specific commentaries:

1. Location and schedule. But information was very clear.
2. Not too much. Just as much as needed.
3. It was perfect!
4. The information received was clear and legible.

QUESTION 3

The methods used e.g. presentations, debates, networking, etc...) within the meeting were...

Poor	Fair	Neither	Good	Excellent
			25	22

Specific commentaries:

1. The presentation of Mobility Actions at Università degli Studi di Bergamo was difficult to follow.
2. According to time schedule.
3. Nothing special, normal level.

QUESTION 4

For me and my work, these aspects of the Conference were the most important (please, select the 3 more important for you):

Gain knowledge on sustainable mobility late research results	30
Get to know the late succesful sustainable mobility practices	33
Network with other universities	27
Network with sustainable mobility companies	7
Network with other mobility stakeholders	5
Get to know the opportunities offered by the European University Network for Sustainable Mobility	18
Visit the local area	8

QUESTION 5

Has the Conference been useful to make you aware about the relationship between transport and climate change?

YES	NO
33	12

Specific commentaries:

1. Poor.
2. I already was well aware of this connection.
3. Already familiar with the issue.
4. I was already aware.
5. Yes, it is a reality now and my awareness related to this topic increased.
6. No, this issues are quite well known. I'd like to know that they are on the table and wait for quixk solutions.
7. I haven't seen all the presentations, but so far not really.
8. It doesn't need to do this.
9. I have already been aware.
10. Yes. However not only the conference is a manner to increase the awareness.
11. No, not specific. I was really aware even before.
12. Not that much. It is a well known topic but even the themes faced during the conference were different, mainly based are experiences.
13. Definitely yes. In my opinion climate plays an important rol in sustainble mobility. However, it's not the most important.
14. The transportation of university staff was not adressed but it is an interesting question concerning climate change.
15. In the special case of mobility in universities, it has.
16. Yes, of course. But the most important thing is that is a meeting point to share experiences in sustainable mobility.
17. I was already aware, but I think it is important to rise more awareness.
18. Yes, reduce car use is the main goal.
19. Has added value.

QUESTION 6

Could the information provided make you change your usual means of transport to a more sustainable one?

YES	NO
31	14

Specific commentaries:

1. Fair.
2. I already use public transport to get to work.
3. Already sustainable.
4. Yes, as I learnt about alternatives I didn't know.
5. I'm thinking of changing my usual mode of transport to other pro-sustainable means (i.e. bike).
6. No, use Public Transport as often as the PT offer is accessible for me.
7. Hopefully it will help to apply good practices to my university.
8. I already try to do, but it showed it is needed.
9. No, because I already use Public Transport and active modes.
10. I use sustainable means of transport already.
11. Yes, the information is much important to rise awareness.
12. No, I already use sustainable mobility transport modes.
13. I already do. For some it was a good opportunity to get in touch with other best practices.
14. I like to ride a bike, but I ride more recreationally. Unfortunately I have to work and the journey is complicated. I will promote cycling and persuade colleagues to change transport to a greener one.
15. No, because I already use a bike to move.
16. Yes, but most important is to transfer this information to the community. Not only me, the community (university and their families and the citizens in general).
17. I already use public transport as my main mean of transport, but cycling is something I should consider.
18. Yes, is the main goal and argument.
19. Already aware but the project helps develop thinking around this challenging area.

In your opinion, what was the most remarkable result of the Conference?

"Numerous alternatives, very creative ones, to improve mobility sustainability. Also that they can be transferred to other different communities than universities".

"Importance of universities as poles of mobility and its relationship with CO₂".

"The possibility to cooperate with students and universities".

"The experience interchange with other universities in the sense of knowing that we all have similar problems".

"Meeting point to share Best Practices in Sustainable Mobility and try to find solutions to this problem, which is the cause (one of the most important) of the greenhouse".

"Networking opportunities".

"The cooperation aspects. The student involvement".

"Universities in Europe are active in a field of sustainable mobility. They are good news!"

"The exchange of practices among European countries".

"Discover the field to cooperate between the university and public authorities on case of mobility plans and sustainable transport solutions introduction".

"Networking and building partnerships and memories".

"Bringing together so many stakeholders concerning the topic is the most remarkable result to exchange and learn from each other experience".

"Dialogue and knowledge sharing".

"To see how enthusiastic and dedicated people are to promote sustainable transport solutions".

"The U-MOB LIFE Project has received funding from the LIFE programme of the European Union"
